**M**edicare Africa Expo & Conference will be held from 22nd to 24th August 2013, at Visa Oshwal Centre, Nairobi, Kenya. Medicare Expo objective is "to create a network of medical health workers and medical service providers", and this aptly captures the vision behind this event. According to the organizers Medicare Africa Limited, the Event will focus on medical equipment, scientific and laboratory instruments, hospital furniture, pharmaceutical products and services.

The exhibition aims at providing the exhibitors an opportunity to liaise with a cross-section of health professionals which include medical doctors, aspiring health practitioners and hospital administrators. The networking of both the medical health workers and medical service providers is

vital in stimulating discussions on their role not only in Kenya but also in third world countries, which are still grappling with issues of poverty, disease and inaccessibility to proper medical care and treatment.

As the various stakeholders from both the public and the private sectors gather every year for the expo, it has been imperative for them to exchange ideas on the efficient management of the

medical sector to ensure the effective use of the medical products while providing quality service. This definitely enhances the client base for each of the stakeholders involved: both the service providers and the health workers in the medical field.

The exhibitors are also accorded a unique prospect of launching and displaying new products aimed at improving the quality of health services not only in Kenya but also within the region and abroad.
